

CHC TOKEN WHITE PAPER

CREATED FOR YOUR SUCCESS
COMMUNITY HELPER COIN

INTRODUCTION 01.

CHCToken is a decentralized cryptocurrency designed for long-term investment and stability. With a total supply of 1 trillion tokens, CHCToken has the potential for price appreciation over time. The CHCToken presale offers discounted prices and bonuses for early adopters, and there is also a direct referral program. CHCToken has a unique reflection tax system in place to support the stability and value of the token. We invite you to learn more about CHCToken and its features in the full whitepaper.

02. TOKEN SUPPLY

CHCToken has a total supply of 1 trillion tokens. This large supply allows for flexibility and versatility in the use of CHCToken, as well as providing a strong foundation for the token's value. The token supply is an important factor in the cryptocurrency market, as it can impact the perceived scarcity and value of a cryptocurrency. CHCToken is well positioned to become a major player in the market with its large token supply.

PRESALE DETAILS 03.

CHCToken's presale will run for a period of three months, providing ample opportunity for interested parties to purchase the token at discounted prices. During the first two months of the presale, a private sale will take place with different pricing tiers.

The price of CHCToken will gradually increase over the course of the private sale, with the first month's price being \$1 = 3,000,000 CHC Tokens, the second month's price being \$1 = 2,500,000 CHC Tokens, and the third month's price being \$1 = 2,000,000 CHC Tokens. After the private sale, a public sale (pinksale) will take place with a price of \$1 = 1,000,000 CHC Tokens.

In addition to discounted prices, those who make purchases of \$500 or more during the presale will receive a bonus of 10% on their purchase. CHCToken also has a direct referral program that gives a 10% bonus on token purchases to those who refer friends and family to the sale. This referral program is an excellent way for supporters of CHCToken to earn extra tokens and help spread the word about the project.

04. TAX SYSTEM

CHCToken has implemented a unique reflection tax system that helps to ensure the stability and value of the token. When a CHCToken is bought, a tax of 20% is applied. This tax is then distributed in the following way: 10% is distributed to all holders of CHCToken in proportion to their holdings, 3% is used for auto liquidity, 2% is used for buyback and burn, and 5% is put into the CHC vault.

This reflection tax system helps to ensure that the value of CHCToken remains stable over time, as the buyback and burn mechanism reduces the total supply of the token and the distribution of a portion of the tax to all holders helps to increase demand. The sell tax for CHCToken works in a similar way, with 20% of the sale price being taxed and distributed in the same manner as the buy tax.

Overall, the reflection tax system for CHCToken is designed to support the long-term stability and value of the token, benefiting all holders.

05. CONCLUSION

In conclusion, CHCToken is a versatile, secure, and decentralized digital asset with a total supply of 1 trillion tokens. The CHCToken presale will run for three months, with different pricing tiers for the private sale (first two months) and the public sale (pinksale, third month). Purchases of \$500 or more during the presale will receive a bonus of 10%, and there is also a direct referral program that gives a 10% bonus on token purchases. CHCToken has a reflection tax system in place for both buy and sell transactions, with the tax being distributed to holders, used for auto liquidity, used for buyback and burn, and put in the CHC vault. The purpose of CHCToken is to encourage users to hold the token for at least a year, with the potential for appreciation of the CHCToken price over time.
